

## Enporion's Supply Chain Manager<sup>®</sup>

is a suite of purchasing and order management tools accessed over the web or directly connected to your company's existing systems. Buyers can use Procurement Manager to shop for items in an electronic catalog via Catalog Manager<sup>®</sup> or they can "round-trip" to a supplier's particular service, all without leaving the Enporion Marketplace. Suppliers can use Order Manager to create electronic invoices and transmit them back to the buyer, giving them the control to accept or reject line items and provide shipping information on a line item level. Both buyers and suppliers with existing management systems or EDI can take advantage of Transaction Manager's document translation capabilities in order to seamlessly connect with the Enporion Marketplace.

### Customized Solutions

Choose from the Supply Chain Manager<sup>®</sup> tools that meet the needs of your organization. Enporion can design a solution that meets your Direct and MRO / Indirect Materials requirements.

### Customer Value

**Procurement Manager** - Enables the roll-out of electronic procurement to end users, while maintaining company's procurement approvals and procedures.

**Order Manager** - Suppliers can electronically accept purchase orders and change orders, and can generate purchase order responses, invoices, and advanced shipment notifications.

**Catalog Manager<sup>®</sup>** - Provides a single look & feel to enable buyers to easily navigate hundreds of supplier catalogs and quickly pinpoint a desired item. Catalog Manager also manages Buyer-specific views and pricing.

**Transaction Manager** - With a single connection buyers can seamlessly support the transaction format needs of the entire supplier community. Transactions can be exchanged in multiple formats including email, EDI, XML, etc.

**Bid Manager** - Buyers can conduct forward and reverse auctions, ensuring best possible market value in a real - time electronic environment. Buyers also receive full support of Enporion's Dynamic Commerce Team.

**Settlement Manager** - Provides increased efficiency to accounts payables, allowing buyers and suppliers to achieve the full advantages of electronic invoice processing and payment, and complete the requisition-to-payment process; Settlement Manager simplifies payment processing between buyers and their suppliers, making invoice and payment management faster, more accurate, and less expensive.
